POWER: 12V DC 	WORKING TEMPERATURE: -1°C/30°F; +55°C/131°F 	LIGHT INDICATOR: BLUE/RED 	STAINLESS STEEL CUP CONSTRUCTION 	CONNECTION: PLUG&PLAY or 2 WIRES 	MAX 4 AMP 
--	--	--	--	---	---

THERMICA is a built-in cupholder developed for the marine environments and allows you to select the temperature from a minimum of -1°C (30F) to a maximum of +55°C (131F) with just one button based on the needs. By using the central button you can activate **THERMICA** as a cooler or heater, the 2 functions are highlighted with a blue or red LED light respectively. Holding down the central button for 2 seconds **THERMICA** turns off. During the transition from hot to cold and vice-versa, **THERMICA** deactivates its functions for 30 seconds in order to avoid changing the temperature immediately if the button is pressed unintentionally, after which it will start working at the set temperature. The device is completely waterproof and also includes a water drainage hole on the bottom.

THERMICA

Always with an eye toward innovation, **Gussi Italia** is proud to introduce **Power Wings**, an elegantly crafted extension unit that nestles behind our steering wheels. **Power Wings** gives your customers complete control, putting boat lighting, media, trim tabs, anchor, horn and other dashboard features right at their fingertips.

- Molded from ABS Plastic and Stainless Steel
- Up to 14 total customizable control locations
- Laser etched, backlit console icons corresponding to user activity

Elegantly designed and easy to install, **Power Wings** let your customers take control – without taking their hands off the wheel.
